I0190 - RELATED METER POINT RMP STATUS RULES

BY CAROLINE FREIMULLER

1 PURPOSE

The purpose of this paper is to provide information on I0190 Related Meter Point RMP status rules to the Change Issues Group.

2 BACKGROUND AND SOLUTION

The drafting in Schedule 28 – Related Metering Points has been updated for Market-wide Half Hourly Settlement (MHHS), allowing related Metering Points to be in a Status of Operational or Created in SMRS as long as all Related Metering Points are in the same Status.

This Change Proposal suggests allowing Secondary Metering Points with a Status of Created to be linked to Primary Metering Points with a Status of Operational, for MHHS migrated Metering Points only. A change to Schedule 28 section 5 would be made stating this.

Once the relationship is established, the Data Service will be automatically appointed on the Secondary Metering Point to match the Primary Metering Point, moving the RMP Status from Created to Operational.

3 QUESTIONS FOR THE CHANGE ISSUES GROUP

The Code Manager would like the opinion of the Change Issues Group on the following questions:

- How many new Secondary Metering Points do you expect to link to existing Primary Metering Points over the next two years?
- Do you feel it would be useful to be able to create relationships between Metering Points where the Primary Metering Point is Operational and the Secondary Metering Point is Created?
- In what scenarios do you expect to set up a new Secondary Metering Point against an existing Primary Metering Point (rather than linking two new Metering Points)?

These questions will also be asked as part of an Information Request by the Code Manager.
