## OVERVIEW

This is a housekeeping Change Proposal subject to the Housekeeping Change Proposal process, rather than the Standard Change Process. The nature of the change is that it makes non-material changes to the REC Products to correct typographical, grammatical or consistency errors, and provides an opportunity to introduce necessary clarifications.

## CODE MANAGER RECOMMENDATION

The Code Manager recommends Change Proposal R0239 is **APPROVED** for implementation on 28 February 2025.

## CONTENTS

Code Manager Recommendation ..... 1
1 Summary ..... 3
2 Problem Statement ..... 3
3 Proposed Solution ..... 3
4 Draft Legal Text ..... 4
5 Case for Change ..... 5
6 Appendix ..... 6
7 Glossary ..... 6

# BACKGROUND

## 1 SUMMARY

The Code Manager has identified several typographical and formatting errors, as well as opportunities to provide clarity, improve consistency and accuracy across the REC Services and products. These changes have been assessed as meeting the criteria to be progressed via a Housekeeping Change Proposal.

## 2 PROBLEM STATEMENT

This Housekeeping Change Proposal seeks to make typographical and formatting corrections that have been identified and improve consistency across the REC.

# CHANGE PROPOSAL

## 3 PROPOSED SOLUTION

Here is a high-level overview of the REC Products impacted by this Change Proposal, including the type of change and number of amendments to be made.

| REC PRODUCT | CHANGE TYPE | NUMBER OF AMENDMENTS |
|---|---|---|
| GES Supply Point Enquiry API Technical Specification | Update section 4.2 to correctly list the Data Items as 'supplier' with the Data Items being 'amr_indicator', 'amr_sp', and 'csep_id.' | 1 |
| Schedule 23 - Registration Services | Correct the numbering from 14.6.5 onwards. | 1 |
| Schedule 14 - Metering Operations | - In the table for section 6.4, a footnote has been moved into the "When" of 6.4.15 where it should be in the Interface field of 6.4.13<br>- In the table for section 8.5, a footnote has been moved into the Interface of 8.5.11 where it should be in | 3 |

| | | |
|---|---|---|
| | the Interface field of 8.5.12<br>- Section 12.5.14 does not include a footnote at all, but the same process step is seen in 12.5.14 as in 8.5.12. | |
| REC Main Body | Remove obligation on Gas Retail Data Agent (GRDA) and Electricity Retail Data Agent (ERDA) from clause 9.24 | 1 |

**GES Supply Point Enquiry API Technical Specification**

The example responses detailed in section 4.2 of the GES Supply Point Enquiry API Technical Specification are broken down as 'mprn' with three Data Items; 'mprn', 'installation name', and 'network name.' This is, however, not reflective of the correct responses that would be returned on an API call. The actual structure is 'supplier' with the Data Items being 'amr_indicator', 'amr-sp', and 'csep_id.'

**Schedule 23 - Registration Services**

Step 14.6.5 is duplicated. This needs correcting and the following numbers in the table need updating as a result.

**Schedule 14 – Metering Operations**

Following the implementation of R0181 Schedule 14 - Metering Operations Footnote Review some of the footnotes have been moved into the incorrect field of the process step.

**REC Main Body**

Remove the final sentence from Main Body Clause 9.24 –

"Until such time as this information is available via the Central Switching Service, the Gas Retail Data Agent and the Electricity Retail Data Agents shall ensure that this information is made available to the Code Manager."

As this is an unnecessary duplicate obligation as data now provided by the Central Switching Service.

## 4 DRAFT LEGAL TEXT

The legal text changes to deliver the proposed solution to R0239 can be found here.

## 5 CASE FOR CHANGE

The Code Manager considers that there is a positive case to implement this Change Proposal, on the basis that:

- The proposed solution is fully formed and appropriately resolves the problem statement.
- The impact of not implementing this solution would cause detriment to Market Participants, as the REC would not reflect the current market arrangements and could result in new Market Participants interpreting processes differently to existing Market Participants.
