OVERVIEW

In line with the Ofgem Code Reform, there is a need for standardisation of prioritisation across codes. This change is to update the Cross Code Steering Group (CCSG) Terms of Reference to include this information.

CODE MANAGER RECOMMENDATION

The Code Manager recommends that the REC Change Panel:

- **APPROVE** the proposed Change solution;
- **APPROVE** the proposed implementation approach; and
- **APPROVE** the proposed implementation date of 26 June 2026.

BACKGROUND

1 SUMMARY

As part of the Ofgem Code Reform which looks to standardise how changes and modifications are prioritised across all Codes, there is confirmation that for cross-code changes the prioritisation will be set by the lead code with all non-lead codes using the same prioritisation. It has been discussed at the Cross Code Steering Group (CCSG) and for now, the preference is to include this within the CCSG Terms of Reference (ToRs) so this requirement is captured within codified documentation.

2 PROBLEM STATEMENT

Failing to update the CCSG Terms of Reference could result in unintentional ambiguity and leave no place within any Code to record the requirement for all codes to align with the prioritisation of the lead code.

4 CROSS-CODE IMPACTS

As this change seeks to update the ToRs for the CCSG there will be minimal impact to other codes for ways of working in relation to prioritisation scoring.

SOLUTION

8 PROPOSED SOLUTION

This change will introduce a new clause into the CCSG ToRs to detail the changes for prioritisation set out by Ofgem.

4.4 Once the lead code has been determined, the representative for that code shall ensure the relevant change proposal(s) are raised and impact assessed. Where change proposals are required under multiple codes, representatives from each code shall co-ordinate discussions and facilitate a single cross code impact assessment.

4.4A Where reasonably practicable, all codes will use the same prioritisation for the Issue/Change/Modification as set by the lead code.

9 DRAFT LEGAL TEXT

The legal text changes to deliver the proposed solution to R0308 can be found here.

PRELIMINARY ASSESSMENT

10 BUSINESS CASE ASSESSMENT

COSTS

There are no costs associated with this Change Proposal.

BENEFITS

This is a consequential change to R0304 and facilitates in achieving the benefits for that change, which is to support the REC's ability to operate consistently within the reformed code governance framework.

11 CASE FOR CHANGE

The Code Manager considers there is a positive case for change for implementing this Change Proposal on the basis that the proposed solution:

- Is both viable and implementable, and effectively resolves the problem statement;
- Has no associated central systems costs or any associated Party costs;
- Has minimal effort required for implementation; and
- Supports the REC's ability to operate consistently within the reformed code governance framework.

12 SUMMARY OF CONSULTATION RESPONSES

A consultation was circulated on 20 March 2026 to obtain views on the Change Report (For Consultation). In total two responses were received from DNOs. The key themes from these responses have been summarised and set out below. The non-confidential responses have been published here.

12.1 SUMMARY OF RESPONSES

Both DNOs have agreed that there are no impacted Parties and that the Change Proposal should be implemented on 26 June 2026 with a Big Bang implementation approach. Both respondents agreed this Change Proposal should be subjective to Self-Governance approval by the REC Change Panel. All respondents were supportive of the legal text changes.

13 SUMMARY OF AMENDMENTS MADE FOLLOWING CONSULTATION

There have been no changes following consultation for this Change Proposal.
