STATUS	FOR DECISION

SHARING METERING ASSET DATA GUIDANCE – UPDATE FOR APPROVAL

BY HARRIET TRUSS

1 PURPOSE

This paper provides the REC Metering Expert Panel (RECMEP) with a proposed change to the Sharing Metering Asset Data – MHHS Guidance document, to enable a MEP decision on the document.

2 PROPOSED CHANGE

2.1 BACKGROUND

The Sharing Metering Asset Data guidance was developed to support understanding in consideration of the significant changes made for MHHS to the systems and processes used for sharing Meter Technical Details (MTD). The guidance was implemented as Category 3 REC document on 22 September 2025, under the ownership of the Metering Expert Panel.

During MHHS transition it has been highlighted that regular occurrences of MTDs are only being sent to one of the appointed MOAs for Metering Points where the Metering Equipment is shared. In particular, the issues seen are with Import/Export Metering Points.

2.2 PROPOSAL

An update to the Sharing Metering Asset Data document is proposed to enhance the guidance available to REC Parties, as follows:

New paragraph on page 8, in the 'Metering Related DIP Market Messages for MHHS Metering Points' section:

> For Metering Points where the Metering Equipment is shared (for example, Associated Import / Export), when MTD or Energisation updates are required, the appointed MOA must update each impacted Metering Point individually by sending the required DIP Market Message.

Note: There is no change in obligations as a result of this enhanced guidance.

3 COMMITTEE ACTIONS

Committee Members are invited to take the following actions:

- **NOTE** the contents of the paper;
- **APPROVE** the proposed updated 'Sharing Metering Asset Data – MHHS Guidance'

4 NEXT STEPS

Once approved the update Sharing Metering Asset Data – MHHS Guidance document will be implemented via the Category 3 change process in April 2026.
