Table of contents

- Based on the pre-work responses, what are the most common types of non-domestic sites we must ensure the calculator can support?
- Which appliances or equipment currently missing from the theft calculators should be included for SMEs? Please list up to five and rank them in order of importance.
- Which appliances or equipment currently missing from the theft calculators should be included for large I&C properties? Please list up to five and rank them in order of importance.
- Which property types or business categories currently missing from the calculator should be included for SMEs? Please list up to five and rank them in order of importance.
- Which property types or business categories currently missing from the calculator should be included for large I&C? Please list up to five and rank them in order of importance.
- Would adding additional structural inputs (such as floor area load in use, power factor etc. which are already included) improve calculation accuracy for I&C cases?
- If yes, which metrics would be most valuable?

Table of contents

- Are there different requirements for gas and electricity?
- Rather than expanding long lists of appliances and property types, would a more flexible input method (load-based entry, kW rating entry, configurable templates) be preferable?
- What type of prompts or inputs would better reflect the diversity of I&C sites?
- If the non-domestic calculator were to be enhanced in phases, which capabilities should be prioritised first?

Based on the pre-work responses, what are the most common types of non-domestic sites we must ensure the calculator can support?

0 1 9

(1/2)

- Sports pavillions
- Construction sites
- Indoor farms
- Convenience stores
- schools
- schools
- Schools
- prisons
- office blocks
- Farms
- Property management
- Restaurants
- Supermarkets
- Vets
- Cinemas, arcades
- food processing/ storage
- Churches
- EV charging sites
- light industrial units eg powder coating
- Pubs
- Garages
- Communal heating for blocks of flats
- Car repair/ garages
- Car washes

Based on the pre-work responses, what are the most common types of non-domestic sites we must ensure the calculator can support?

0 1 9

(2/2)

- Car charging stations
- Nail salons
- Restaurants
- Crypto mining
- Takeaways, hotels, pubs
- Hairdressers
- Gyms Tanning shops
- Pubs
- Convenience shops
- Launderettes
- Bit-coin mining, unauthorised HMOs
- Gyms
- Betting shops
- 3
- Takeaways
- Factories
- Takeaways
- Takeaways
- Off licences and takeways

Which appliances or equipment currently missing from the theft calculators should be included for SMEs? Please list up to five and rank them in order of importance.

006

- Air con
- Air fryers, sunbeds, freezers, ev chargers, car washes
- Equipment used within a car wash 2 Laundrette washers 4

  Fridge/Freezers 1 Ev chargers 5

  Construction 3
- Custom fridges Custom ovens and grills
- 1 - Cannabis equipment 2 - Ev Chargers 3 -Sunbeds 4 - treadmills/ gym equipment 5 - Construction Equipment
- Car was equipment
- Tanning booths
- 1 - Washer/ dryers 2 - Cannabis cultivation equipment 3 - Paint spray booths (gas & electric)
- Electric pizza ovens

Which appliances or equipment currently missing from the theft calculators should be included for large I&C properties? Please list up to five and rank them in order of importance.

0 0 2

- Food preparation equipment
- 1 - Gas space heaters (open plan factories) 2 - large commercial water heaters (commercial launderettes) 3 - large scale walk in fridge/ freezers (food wholesalers/ butchery plants)

Which property types or business categories currently missing from the calculator should be included for SMEs? Please list up to five and rank them in order of importance.

0 0 8

- Hospitals
- Takeaways
- Salons, tanning shops, takeaways
- Fast food / takeaways - high
- 1 Car garages 2 Car wash 3 Sunbed shops 4 Hotels 5 Farms
- Launderettes - high priority
- Car washes
- Launderettes
- 1 - Gyms/ sports centres 2 - Schools 3 - Hotels 4 - Religious Centres 5 - Garages
- Garages

Which property types or business categories currently missing from the calculator should be included for large I&C? Please list up to five and rank them in order of importance.

0 0 3

- Garages - compressors, pumps, car lifts Car washes - jet wash & industrial hoovers Factory's - conveyor belts, drilling, cutting machine
- Sites that use CHPs - combined heat and power
- Precision Engineering firms - lathes etc Garages - hydraulic lifts Car wash sites - jet washes More billable info on cannibas e.g carbon filters and different types of fan/lighting etc

Multiple choice poll

Would adding additional structural inputs (such as floor area load in use, power factor etc. which are already included) improve calculation accuracy for I&C cases?

0 1 8

If yes, which metrics would be most valuable?

007

- Crypto mining averages equipment used
- Floor area
- Power consumption to reflect modern multi spectrum led lights
- Floor area, number of floors
- Floor area
- Number of floors
- Floor area

Are there different requirements for gas and electricity?

0 0 2

- Agree, can't think of any differences, would be keen to hear some
- Can't think of any differences

Multiple choice poll

Rather than expanding long lists of appliances and property types, would a more flexible input method (load-based entry, kW rating entry, configurable templates) be preferable?

0 1 7

What type of prompts or inputs would better reflect the diversity of I&C sites?

003

- breakdown for both - although gas is more lacking in the range of sites
- Yes by sic codes - sector type would help
- sites to be broken down into categories food/ manufacturing/ engineering etc

- Market segment

If the non-domestic calculator were to be enhanced in phases, which capabilities should be prioritised first?

005

- 1) Make it more user friendly, with guided input 2) More accessibility 3) More flexibility when inputting equipment.
- 1 - Updating equipment lists 2 - Updating business baseline options 3 - Matching regions to GSP groups
- Usability, maybe online instead of a macro based as.
- Moving to a simpler set of inputs with less granularity around appliances, etc
- 1 - appliance lists (G &
- E) 2 - More flexibility in the % usage time (G) 3 - Review of I&C sites
