R0094 - CLARIFY OBLIGATIONS ON GAS METER EXCHANGES THAT OCCUR CLOSE TO COS

BY BRADLEY MERCER

1 PURPOSE

This paper provides the REC Change Panel with an overview of the documents provided to it with respect to R0094 – *Clarify Obligations on Gas Meter Exchanges that Occur Close to CoS*. It clarifies the determinations required to be made during the meeting by the REC Change Panel Members.

2 BACKGROUND

When a Meter Equipment Manager (MEM) carries out work on the Gas meter concurrently with a switch, the MEM may be de-appointed before it sends updated meter information to the Central Data Service Provider (CDSP). This results in the gaining Registered Supplier not having accurate meter information, which can lead to a poor Consumer experience.

The following documents have been provided to the REC Change Panel for its consideration at the meeting scheduled for 03 October 2023:

- Change Proposal Plan v1.0;
- Initial Assessment Report v1.0

The Change Proposal Plan proposes the timetable for the Change Proposal, and further details with respect to the plan for assessment and consultation.

The Initial Assessment Report sets out the detail of the proposed changes, including identified impacts, prioritisation status and responsible committee.

The REC Change Panel is asked to consider the content of the documents provided. Members are asked to determine that the proposals set out within them are based on complete assumptions which are properly aligned with the REC Change Process.

3 COMMITTEE ACTIONS

Committee Members are invited to take the following actions:

- **REVIEW** the Change Proposal Plan and Initial Assessment Report for R0094; and
- **APPROVE** the Change Proposal Plan proposed by the Code Manager.
