4 R0164 – REMOVING THE ENUMERATIONS FROM COMMUNICATIONS METHOD DATA ITEM (J0386)

As the Lead Analyst for R0164, LBe provided RECCP Members with an overview of the Final Change Report (FCR).

LBe informed Members that R0164 had been raised to accommodate a Balancing & Settlement Code (BSC) led change. LBe highlighted that the BSC change proposes to create a central register of permissible enumerations for the Communication Method Data Item ((DI50178) (J0386)), and this Change therefore seeks to update that Data Item appropriately to reflect the BSC modification.

LBe advised that, as a result of the BSC change, an update was required to the REC Data Specification with respect to data item DI50178. LBe confirmed that this would remove the current set list of methods that were under REC control and bring them under the control of the BSC instead, leaving a note to explain that this process was now managed by the BSC.

LBe advised that one consultation response had been received by the Code Manager which was in support of the change. LBe confirmed that the Code Manager recommendation was that R0164 was approved for implementation on 23 August 2024.

The Chair advised Members that they would be voting to Approve or Reject the FCR for R0164. RECCP Members noted the contents of the Change Proposal Plan (CPP) and:

- **AGREED** unanimously approve of the proposed change solution.
- **AGREED** unanimously to approve the proposed implementation approach.
- **AGREED** unanimously to approve the proposed implementation date of 23 August 2024.

5 R0167 – CHANGE IMPROVEMENTS

As the Lead Analyst for R0167, GD provided RECCP Members with an overview of the FCR.

GD informed Members that the change was seeking to make the required updates to Schedule 1 and Schedule 5, to enable process enhancements to be made to support improvements to the Change Process.

GD advised that several improvements to the change process had been identified by the Code Manager. GD confirmed that the proposed improvements had been shared with industry at meetings and events including a change process improvements webinar on 04 October 2023. GD provided Members with an overview of the improvements and highlighted that the key theme of the changes was earlier party input into the change process.

GD advised that, following the initial publication of the FCR, responses were generally supportive of the change; however, subsequent comments received from a service provider did not support the change. GD advised that the Code Manager had met with the service provider and resolved the issue, mitigating their concerns. GD advised that the Code Manager had also held a webinar on 20 June 2024 where stakeholders were given an overview of the proposed process and had the opportunity to ask questions. GD confirmed that the Code Manager had received good feedback from the session and that parties had indicated support for the change on the session.

As the Lead Analyst for R0049, LBe provided Members with an overview of the Change Proposal Plan (CPP) and Initial Assessment Report (IAR).

LBe informed Members that R0049 had been raised by the Central Registration Service (CRS) Provider to address risks they have identified associated with Clause 13 of the REC Main Body, relating to Intellectual Property Rights (IPR). Operational realities that have emerged since the

REC go-live mean that Clauses drafted prior to go-live may now need to be reviewed to reflect current CRS practices.

LBe advised that the change had taken a long time to progress from the time it was initially raised due to the complex nature of the legal discussions which needed to take place to form a solution. LBe advised that the change would be bypassing the Preliminary Change Report (PCR) stage and progressing straight to Consultation.
