OVERVIEW

This Issue seeks to extend access to Retail Energy Location (REL) Address data to RECCo and government departments in Great Britain to facilitate key government reporting and REC processes.

CODE MANAGER RECOMMENDATION

The Code Manager recommends that the REC Change Panel:

- **APPROVE** the Proposal Plan, including the Responsible Sub-Committee, Change Path, Priority Status, Urgency and timetable.
- **APPROVE** that this Change Report contains sufficient information to proceed to Consultation, noting the Code Manager Minded-to Position below.

The Code Manager Minded-to Position is to recommend that the REC Change Panel:

- **APPROVE** the proposed change solution;

- **APPROVE** the proposed implementation approach; and
- **APPROVE** the proposed implementation date of 26 February 2027.

BACKGROUND

1 SUMMARY

REC Change R0330 – Use of REL Data by the Authority expanded the Authority's permitted access to Retail Energy Location (REL) Address data and Unique Property Reference Numbers (UPRNs), for purposes consistent with its Ordnance Survey (OS) licence. REC Schedule 29 – Address Management sets out that the use of REL Addresses is determined in accordance with the Data Access Matrix (DAM), and the Electricity Enquiry Service (EES) Service Definition sets out that the Authority can access and use REL Address data for purposes consistent with its licence from OS.

RECCo and government departments in Great Britain should be able to access REL Address data with an appropriate OS Address Licence. This Issue seeks to clarify obligations relating to REL Address data access for RECCo and government departments to facilitate key government reporting and REC processes.

This Issue was originally within the scope of REC Issue I0218 – Proposal to Enable Broader Use of Retail Energy Location (REL) Data for Non-Switching Applications. I0324 can progress separately as it does not require the system changes that are integral to I0218.

2 PROBLEM STATEMENT

Currently, REC Schedule 29 – Address Management states that access to REL Address data is determined in accordance with the Data Access Matrix (DAM). The Electricity DAM permits the Authority, the Switching Service Desk, and the SMETS Service Desk (in addition to Suppliers and Third-Party Intermediaries (TPIs)) to access REL Address data. RECCo and government departments in Great Britain do not currently have access to REL Address data, limiting their ability to carry out key government reporting and REC processes.

3 IMPACTS

REC PARTIES AND SERVICE USERS
Government departments in Great Britain

REC SERVICE PROVIDERS
Electricity Data Access Matrix

RECCO / REC CODE MANAGER
REC Code Manager

REC DOCUMENTS / PRODUCTS
Electricity Data Access Matrix
Electricity Enquiry Service Definition

MHHS
The Code Manager has not identified any MHHS impacts for this change.

4 CROSS-CODE IMPACTS

The Code Manager has not identified any cross-code impacts of this change.

5 PROPOSAL PLAN

Milestone	Activity	From	To
Definition		**05 May-26**	**17 Sep-26**
	Solution Analysis	May	June
	Solution Development	June	August
	Legal Review	August	August
	Code Manager Initial Assessment	August	August
Change Proposal		**18 Sep-26**	**27 Oct-26**
	Consultation	September	October
	Final Determination	October	October
Voting		**28 Oct-26**	**28 Oct-26**
	Appeal Window	29 October	12 November

The solution analysis was put on hold whilst R0330 was developed.

6 STAKEHOLDER ENGAGEMENT

The Code Manager has not identified any impacts to REC Parties as this is a legal text change only, clarifying the REL Address data access of RECCo and government departments. A Party impact assessment is not required as this Issue seeks to clarify existing obligations.

The Code Manager will provide an update to the Performance Assurance Board (PAB) to explain proposed changes to the Electricity Data Access Matrix (DAM).

7 PRIORITISATION CATEGORY AND URGENCY

7.1 PROPOSER REVIEW

This Issue was submitted prior to 29 May 2026, the implementation of the Ofgem Code Prioritisation Harmonisation. There was no requirement for the Proposer to provide their review of the Prioritisation Category and Urgency when this was Issue was submitted.

7.2 CODE MANAGER REVIEW

The Code Manager is proposing this Issue be given an Urgency status of Standard and a Prioritisation Category of Standard.

The Code Manager believes this Issue:

- Does not meet the Ofgem criteria for Urgency;
- Has a medium alignment to the Strategic Direction Statement (SDS) as it has as a reasonable SDS link but is one of several similar Standard changes with comparable strategic value;
- Has medium importance as the change delivers useful but broadly comparable benefits to other Standard changes; and
- Has a low complexity as it can be delivered late in the Standard queue without increasing risk or effort.

RETAIL ENERGY CODE

SOLUTION

8 PROPOSED SOLUTION

The proposed solution is to amend the legal texts of the EES Service Definition and the Electricity DAM.

The EES Service Definition will be amended to allow RECCo and government departments in Great Britain to access and use REL Addresses for other purposes consistent with their licence from OS.

The Electricity DAM will be amended to update the user from 'Code Manager' to 'RECCo' ensuring the document remains accurate following Code Reform. RECCo's access in the DAM will be expanded to include all REL Address data (updating access from 'No' to 'Yes') to enable key REC processes, and government departments in Great Britain's permission to access REL Address UPRN data will change from 'TBC' to 'Yes'.

9 DRAFT LEGAL TEXT

The legal text changes to deliver the proposed solution to I0324 can be found here.

RETAIL ENERGY CODE

PRELIMINARY ASSESSMENT

10 SUMMARY OF IMPACT ASSESSMENT ACTIVITY

10.1 SERVICE PROVIDER IMPACT ASSESSMENTS

No Service Provider impact assessment was required as part of this Issue.

10.2 REC PARTY IMPACT ASSESSMENTS

No Party impact assessment was conducted as part of this Issue.

11 RISKS, ASSUMPTIONS, ISSUES AND DEPENDENCIES

11.1 RISKS AND ISSUES

Neither risks nor issues have been identified.

11.2 ASSUMPTIONS AND DEPENDENCIES

NO.	ASSUMPTION	NOTES	HOW/WHEN TO VALIDATE
I0218	I0324 can progress separately on the assumption it does not require the system changes that are integral to I0218.	This Issue was originally within the scope of REC Issue I0218 – Proposal to Enable Broader Use of Retail Energy Location (REL) Data for Non-Switching Applications.	N/A

No dependencies have been identified.

12 BUSINESS CASE ASSESSMENT

12.1 COSTS

There are no costs associated with this Issue.

12.2 BENEFITS

12.2.1 INTANGIBLE BENEFITS

	BENEFITS DESCRIPTION
IMPROVES CLARITY OF THE REC ON USE OF REL DATA	The implementation of this Issue will provide clarity to industry on the use of REL data. The Issue specifically broadens access to and use of REL data to RECCo and government departments in Great Britain for other purposes consistent with their licence from OS.
SUPPORTS REC PROCESSES AND KEY GOVERNMENT REPORTING	The implementation of this Issue will support RECCo with REC processes and government departments in Great Britain with key government reporting.

12.3 COST BENEFIT ANALYSIS

There are no central systems costs, no expected costs to Parties and two intangible benefits associated with this Issue. As such, the Code Manager believes that there is a positive case for change.

13 CASE FOR CHANGE

SELF GOVERNANCE

The Code Manager considers that there is a case for change to implement this solution, on the basis that it:

- Is both viable and implementable, and it appropriately resolves the problem statement; and
- Has no associated central system costs and no associated Party costs;
- Has proportionate effort required for implementation;
- Will support RECCo and government departments in Great Britain in using the data for REC processes and key government reporting.

15 GLOSSARY

TERM	DEFINITION
Electricity Enquiry Service (EES)	means the service described as such in the EES Service Definition.
Electricity Enquiry Service Users (EES User)	means a Party or Non-Party REC Service User which is entitled to use the EES under the Data Access Schedule.
Retail Energy Location (REL)	means a Location to which Energy is delivered via an RMP, and/or from which electricity is exported via an RMP.
Retail Energy Location Address (REL Address)	means the address (or other spatial reference) of each Retail Energy Location, as created and maintained by the CSS Provider. For RMPs in Wales, references to the Retail Energy Location Address include the REL (W) Address, unless the context requires otherwise.
Unique Property Reference Number (UPRN)	means the number by which a property is identified in the GB Standardised Address List.
