ELECTRICITY METERING POINT GUIDANCE

BY BRADLEY MERCER

1 PURPOSE

This paper provides the REC Metering Expert Panel (RECMEP) with an overview of the changes required to the Electricity Metering Point Guidance as a result of the Market Wide Half Hourly Settlement Programme (MHHS).

2 BACKGROUND

Category 3 documents are not in scope of the Market-wide Half Hourly Settlement (MHHS) Programme code workstream. However, a number of Category 3 documents will require amendment to reflect the new arrangements.

The Guidance on Electricity Metering Points, which sits under the responsibility of the Metering Expert Panel, is one of those documents. The attached drafting captures those amendments required to support MHHS. MEP members are asked to review the document and confirm that agree for the Code Manager to progress an industry consultation in preparation for a Category 3 Change Proposal to update the document.

During the review, some housekeeping and improvement opportunities have been identified. For clarity these have not been captured in this version; however, the Code Manager is considering the best approach for these amendments and may progress both sets of changes under the same Category 3 Change Proposal. The Code Manager will consult with MEP on this in due course.

3 COMMITTEE ACTIONS

Committee Members are invited to take the following actions:

- **NOTE** the contents of the paper;
- **REVIEW** the proposed updates to the Guidance on Metering Points document; and
- **APPROVE** the Code Manager's proposed approach.
