# GUIDANCE ON ELECTRICITY METERING POINTS

BY BRADLEY MERCER & HARRIET TRUSS

## 1 PURPOSE

This paper provides the REC Metering Expert Panel (RECMEP) with an overview of the changes required to the Guidance on Electricity Metering Points to support:

- changes to metering arrangements as a result of the Market-wide Half Hourly Settlement (MHHS) Programme
- general housekeeping updates following the annual review

## 2 PROPOSED UPDATES

### 2.1 MHHS UPDATES

Category 3 documents are not in scope of the MHHS Programme code drafting workstream. However, a number of Category 3 documents will require amendment to reflect the new MHHS arrangements.

The Guidance on Electricity Metering Points, which sits under the responsibility of the Metering Expert Panel, is one of those documents. Draft amendments to support MHHS, identified by the REC MHHS drafting leads, were provided to industry for consultation from 27 June to 19 July 2024.

The changes were supported in the consultation responses. The responses, with Code Manager comments, can be viewed in 'Guidance on Elec Metering Points Consolidated Consultation Responses' (Attachment 1).

The draft amendments have been taken forward in the proposed new document, 'Guidance on Electricity Metering Points – MHHS'. The new document has been created using the proposed 2024 updates to the existing guidance document as a baseline. A redlined version, clean version and the consultation responses document are included as 'Attachment 1 – MHHS Updates' with this paper.

As these updates will not be required until, and are directly aligned, to the implementation of the system and code drafting changes for MHHS, the proposed implementation date for this new REC Category 3 document is MHHS Programme Milestone M8 'Code changes delivered'.

## 2.2 2024 UPDATES

During the review activity for the MHHS updates, some housekeeping and improvement opportunities were identified. These have been considered and captured as part of the annual review of the existing Guidance on Metering Points document and the proposed updates can be found in Attachment 2 – 2024 Review Updates. These updates are considered to be housekeeping to improve the quality of the document.

The Code Manager recommends that these updates are implemented at the earliest opportunity.

# 3 COMMITTEE ACTIONS

Committee Members are invited to take the following actions:

- **NOTE** the contents of the paper;
- **REVIEW** the proposed updates to the Guidance on Electricity Metering Points documents; and
- **APPROVE** the proposed housekeeping updates to the 'Guidance on Electricity Metering Points' document for implementation through a Category 3 Change Proposal at the earliest opportunity; and
- **APPROVE** the proposed new Category 3 document the 'Guidance on Electricity Metering Points – MHHS' for implementation via a Category 3 Change Proposal at MHHS Programme Milestone M8 'Code changes delivered'.
