Metering Hubb Engagement

November Update

Key insight
Spikes in engagement align with major updates and targeted communications (such as MEP briefings and new resources), demonstrating that proactive engagement drives traffic. Sustained growth depends on continuous content updates and visibility efforts.

Your Role Is Critical
As MEP representatives, your advocacy of the Metering Hub to those you represent is essential. When you highlight the Hub as a go-to resource, engagement rises. Please continue to encourage its use and share its value within your networks.

We Need Your Input
To keep the Hub relevant and useful, we'd welcome your suggestions:

- New content ideas – What topics or resources would add the most value?
- Ways to spotlight the Hub – How can we make it more visible and engaging for your teams?

Your feedback will help shape the next phase of improvements and ensure the Hub remains a trusted resource.
