DATA ACCESS REQUEST

ADDITION OF DATA ITEMS TO THE HOUSING ASSOCIATION AND RADIO TELESWITCH (RTS) SUPPORT CATEGORY

AUTHORED BY ELISE HANDY – OPERATIONAL ACCOUNT MANAGER, REC CODE MANAGER

REVIEWED BY GLENN SHEERN – HEAD OF REGULATORY SPECIALISTS, REC CODE MANAGER

FOR DECISION	PAB Members are invited to take the following actions: • **APPROVE** the Code Manager's proposed alterations to the Electricity Data Access Matrix; • **APPROVE** the Code Manager's implementation date of these changes for **09 May 2025**.
APPENDICES	• RECPAB_25_0425_07A - Electricity Data Access Matrix v4.7_Draft

1 THE ROLE OF THE REC PAB

The REC PAB agree access requests in accordance with the Code Manager's recommendation because the PAB are responsible for specifying REC Party, Non-Party REC Service User and REC Service Provider security and data protection requirements under the REC.

One key area for consideration is whether the appropriate process has been followed, for example some changes require additional information security analysis, whereas others might require consultation with industry participants.

2 BACKGROUND

The Code Manager has been working with East Lothian Housing Association and National Energy Action on producing guidance on Radio Teleswitch (RTS) Meter switch-off and how to identify when an RTS meter may be present for their relevant properties. Working through different use-cases, some additional data items have been identified that would help indicate these meters. These data items would be provided to both the Housing Association and Radio Teleswitch Support categories.

3 JUSTIFICATION FOR USE CASE

Additional data items have been identified that would support those already approved. The finalisation of the guidance is pending publication whilst further data items are being agreed.

4 ELECTRICITY DATA ITEMS

The request covers the following data items from EES:

Data Item	Purpose	Classification (Future, subject to change based on implementation of R0148)
Current Supplier Registration Date (DC03)	To understand whether there has been a recent change in Supplier.	Always Open
Domestic Consumer Indicator (DC03)	Domestic Consumers are mostly relevant for these categories.	Always Open
Meter Install Date (DC03)	To enable prioritisation of meter exchanges which are nearing or past their certification date.	Always Open
MPAN Relationship - Primary MPAN (DC03)	To enable all MPANs to be available when speaking with Suppliers.	Personal
MPAN Relationship - Secondary MPAN (DC03)	To enable all MPANs to be available when speaking with Suppliers.	Personal
MPAN Relationship - Secondary Supplier (DC03)	To understand if a secondary MPAN has a different Supplier.	Always Open

MPAN Relationship - Secondary Supplier Name	To understand if a secondary MPAN has a different Supplier.	Always Open
Number of MPANs for Meter	To provide a count of how many MPANs are associated with a property.	Always Open

5 DATA PROTECTION, INFORMATION SECURITY AND ANY SPECIFIC CONSIDERATIONS

We do not consider the addition of these data fields to result in an increase to security and data protection risks, and therefore propose to retain the assurance approach per the below:

		Description	Current	Proposed
ISDP Level	Low	Basic information only	No External Assessment	No External Assessment
	Medium	Assessment relevant security accreditation (cyber essentials +)	Verification External Assessment for GUI	Verification External Assessment for GUI
	High	Assessment if information security risk management in REC relevant areas	Standard External Assessment for API	Standard External Assessment for API

7 NEXT STEPS

The Code Manager does not believe that a consultation is required for this request and, if agreed, will implement these changes on **09 May 2025**.

8 PAB ACTIONS

PAB Members are invited to take the following actions:

- **APPROVE** the Code Manager's proposed alterations to the Electricity Data Access Matrix and
- **APPROVE** the Code Manager's implementation date of these changes for **09 May 2025**.
