CRS PROVIDER PERFORMANCE CHARGES 2025/26

AUTHORED BY: MARY MONYEI – SERVICE PROVIDER ASSURANCE, REC CODE MANAGER

REVIEWED BY: VAISHNAVI CAMPBELL-SHARMA - PERFORMANCE ASSURANCE LEAD, REC CODE MANAGER

FOR DECISION:	The Code Manager recommends that PAB: • **APPROVE** the Performance Charges applied to the CRS Provider for the quarter ended 31 December 2025 in line with the REC Performance Charge regime introduced from 1 April 2023 and the Performance Charges scale approved by PAB in March 2025. • **NOTE** that no exemption request was submitted by the CRS Provider for this period.

1 CENTRAL REGISTRATION SERVICE (CRS) PERFORMANCE CHARGES

1.1 BACKGROUND

The REC Change Proposal R0025 was implemented on 01 April 2023, establishing a Performance Charge regime to introduce an economic incentive scheme for the Central Registration Service (CRS) Provider. The introduction of R0210 which came into effect on 01 April 2025 saw an evolution of the CRS Performance Charge. R0210 was designed to incentivise performance in areas where underperformance carries a higher risk compared to other areas by applying a differential weighting.

In March 2025, the PAB (RECPAB_25_0325_04) approved the amount of maximum Performance Charge which can be applied to the CRS Provider in respect of each Quarter of the given Financial Year.

1.2 CRS PROVIDER'S REQUEST TO EXCLUDE PERFORMANCE LEVEL FAILURES

The Code Manager notified the CRS Provider on 05 January 2026 that if they intended to submit any exclusion claims for performance level failures that occurred between 01 October 2025 and 31 December 2025, they must submit the exclusion request by 30 January 2026 as per clauses 5.7 and 5.8 Annex A of REC Schedule 6 - Performance Assurance.

The CRS Provider stated that they would not be submitting any exclusion requests for performance level failures that occurred between 01 October 2025 and 31 December 2025.

2 PERFORMANCE CHARGES CALCULATION FOR FY 2025/26 QUARTER 3

The methodology used for the performance charges calculation was as set out in the change R0210 – Evolution of the CRS Performance Charge, implemented on 28 February 2025 and approved by PAB in March 2025 for performance year 2025/26.

The Code Manager has measured the performance and calculated the Performance Charge for the period 01 October 2025 to 31 December 2025 based on information submitted by the CRS Provider as follows:

Performance Measure Groups	Relative Weighting	Number of metrics under group	Maximum Performance charge each quarter	No of Failures in Q3	Performance Charge for Current Quarter
User Support	30%	18	£14,400	11	£14,400
Service Availability	50%	7	£24,000	0	Nil
Responsiveness and BCDR	20%	16	£9,600	1	Nil
			Total Performance charge for Q3		**£14,400**

The failures recorded by the CRS Provider during the Performance Charge period fell under the User Support and Responsiveness and BCDR category. The one Responsiveness metric in November was only marginally below target (achieving 99.86% versus a 100% target). There was no BCDR event during the period covered, so there was no reporting on this performance.

The table below depicts the level of Performance Charge applicable based on the number of metrics where performance was below target:

	User Support			Service Availability			Responsiveness and BCDR			
	No of failures	Margin at stake	Value (£)	No of failures	Margin at stake	Value (£)	No of responsiveness failures	No of BCDR failures	Margin at stake	Value (£)
On target	0-3	0%	**£0**	0	0%	**£0**	0-2	0	0%	**£0**
Minor failure	4	4.5%	**£2,160**	n/a	n/a	**n/a**	3	n/a	3%	**£1,440**
Serious failure	n/a	9%	**£4,320**	1	15%	**£7,200**	4	n/a	6%	**£2,880**
Severe failure	5	18%	**£8,640**	2	30%	**£14,400**	5	n/a	12%	**£5,760**
Fundamental failure	6+	30%	**£14,400**	3+	50%	**£24,000**	6+	1	20%	**£9,600**

The Code Manager is reviewing the CRS Provider's evidence as part of the Direct Assurance process and will update the PAB if any significant findings necessitate adjusting this quarter's performance charges.

PAB Decision

The Code Manager requests the PAB approve a Performance Charge of £14,400 be applied to the CRS Provider for the period from 01 October 2025 until 31 December 2025.

3 APPENDIX A: YEAR 3 PERFORMANCE CHARGE TREND

The below table shows the performance charges raised in each quarter of 2025/26 Financial Year, including the proposed value for quarter 3.

	Quarter 1		Quarter 2		Quarter 3	
Performance Measure Groups	**No of Failures**	**Performance Charge for the Quarter**	**No of Failures**	**Performance Charge for the Quarter**	**No of Failures**	**Performance Charge for the Quarter**
User Support	6	£14,400[1]	13[2]	£14,400	11	£14,400
Service Availability	0	Nil	0	Nil	0	Nil
Responsiveness and BCDR	2	Nil	1	Nil	1	Nil
Total Performance charge	**£14,400**		**£14,400**		**£14,400**	

[1] This is the recalculated total performance charge value for Q1 based on the information submitted after direct assurance was conducted by the Code Manager, and the initial value reported was £2,160.

[2] This is the recalculated number of User support failures for Q2, based on corrected information submitted following direct assurance by the Code Manager. Although the number of failures reduced from 14 to 13, there was no impact on the performance charge value, as the maximum charge is applied at 6 failures.
