The Ask

Review of reports under the CRS Improvement Project

To agree amendments to the PARC regarding redundant Address Management reports

For Information / Endorsement

Background

- While undertaking the CRS Improvements Project, RECCo, the Code Manager and DCC completed a review of current reporting that is generated as part of REC Obligations.
- As part of this review, Address Management-related reports were identified that are not fit for purpose.
- These reports are produced only for DCC internal consumption.
- The identified reports are captured in the Performance Assurance Report Catalogue (PARC).
- As such, DCC proposed raising a REC change to have these removed from the PARC (they will still be available on an ad-hoc on request basis).
- **Ask from the Performance Assurance Board:** For information/endorsement.
- Note that a REC Change Issue (I0340) has now been raised.

PARC - Address Management Reports

Report name	Current Requirement	Impacted	Change
Address Quality Summary	Latest Monthly Report to be provided on demand	✗	
Unmatched REL Extract	Latest Monthly Report to be provided on demand	✗	
Unmatched ME Extract	Latest Monthly Report to be provided on demand	✓	No longer produce
Matched Extract	Latest Monthly Report to be provided on demand	✓	No longer produce
Address Quality Report	Latest Monthly Report to be provided on demand	✗	
Address Quality Postcode Report	Latest Monthly Report to be provided on demand	✓	No longer produce
