STATUS	FOR DECISION

R0022 – PROPOSED SOLUTION FOR ENDORSEMENT

BY HARRIET TRUSS

1 PURPOSE

On 15 February 2022, the REC Change Panel (RECCP) approved the Initial Assessment Report (IAR) to progress R0022 – Amendment to REC Data Access Matrix. As the Responsible Committee for this Change Proposal, RECCP confirmed they would require endorsement of the proposed solution from the REC Technical Expert Panel (TEP), as the appropriate technical experts. This will inform RECCP's decision making on the Code Manager's recommendation.

With this in mind, this paper asks TEP to consider the proposed solution for R0022 and to provide an endorsement of the solution. This paper is part of the preliminary assessment activity, which will be presented to RECCP on 19 July 2022.

2 BACKGROUND

The Retail Energy Code (REC) Data Access Schedule (Schedule 12) sets out the approach to provision of market data via the Electricity Enquiry Service (EES). The schedule categorises EES Users, e.g. REC Service Users and Non-Party REC Service Users of the EES, and sets out the principle that a defined set of data will be accessible to EES Users depending on their EES User Category.

Under the Master Registration Service (MRA) enquiry service data access was determined on a case-by-case basis. This resulted in variable data access for organisations within the same EES User Category.

R0022 aims to resolve the access variability within EES User Categories, update EES so that it reflects the Data Access Schedule, and progress a solution that facilitates progressing EES access applications.

3 NEXT STEPS

Following consideration of the proposed solution by TEP, the preliminary assessment will be completed. The Preliminary Change Report will be published and presented to RECCP for review and approval to go to consultation.

The Code Manager plans to return to TEP for consideration of the DIA response from the EES Provider on 27 July 2022.

4 COMMITTEE ACTIONS

Committee Members are invited to take the following actions:

- **CONSIDER** the 'R0022 Proposed Solution for TEP Endorsement' paper, and
- **ENDORSE** the proposed solution for it to be taken forward in the Code Manager's recommendation to RECCP
