TEP HEADLINE REPORT

Date: 31/07/2024
via Microsoft Teams

This Headline Report provides a record of the decisions made by the Technical Expert Panel (TEP), and information on other key agenda items from the July 2024 meeting.

1 APPROVAL OF MINUTES

Members were asked if the minutes taken in the June TEP were an accurate representation of the discussion held at the June TEP. No comments and questions were raised. The minutes from the June meeting were therefore approved as final.

2 ACTIONS

There were two action to review at the July meeting:

- **RECTEP_24_0228_01 - UK Link data load update from Xoserve**
- **RECTEP_24_0626_01 - Update on R0096**

For further information on the actions, please refer to the TEP Actions Log.

3 FUTURE CHANGES FOR TEP REVIEW

The Code Manager (CM):

- **NOTED** three changes for TEP review:

R0060[1] – **ERDS Service Definition Time zone Correction:** Update provided as per section 6, below.

R0096[2] – **CSS Message Regeneration Functionality:** Update provided as per section 4, below.

R0120[3] **- Search GES API using Meter Serial Number:** Members were advised that this CP is currently in its consultation period and will be brought to TEP for decision in its August meeting.

For any further information on discussions held at TEP, please refer to the papers and minutes for the relevant month, when published.

4 UPDATE ON R0096 – CSS MESSAGE REGENERATION FUNCTIONALITY

The CM gave the TEP an overview and update on the status of R0096[4] - CSS Message Regeneration Functionality. Included in the update were highlights of lessons learnt, key challenges facing REC Service Providers and REC Parties and a new process to incorporate

solution design into the DIA for complex technical changes. Supplementary information will be circulated alongside the post-meeting papers.

For any further information on discussions held at TEP, please refer to the papers and minutes for the relevant month, when published.

5 DECISIONS

There were **two** changes for decision at the July TEP:

The TEP voted and **APROVED** the following Change Proposals for implementation following the CMs recommendation:

- R0080[5]– Improvements to 'Failed to Deliver' CSS Messages
- R0096 – CSS Message Regeneration Functionality

For any further information on discussions held at TEP, please refer to the papers and minutes for the relevant month, when published.

6 R0060 – ERDS SERVICE DEFINITION TIMEZONE CORRECTION

The CM ran through the problem statement for R0060 in that clarity is needed between the Schedule 1 definition of time zone and the Service Definitions for MPRS. It was mentioned that when consulted on, there was agreement for the case for change across all responses. If approved at the August TEP, R0060 will be implemented June 2025.

For any further information on discussions held at TEP, please refer to the papers and minutes for the relevant month, when published.

7 MHHS REC CODE DRAFTING UPDATE

The final agenda item was an update on the MHHS drafting. The CM ran through a breakdown of drafting activity for MHHS Data Items, Market Messages, Standards Definition Document updates, new data fields and the design documents (ERI011B, and the DES138).

For any further information on discussions held at TEP, please refer to the papers and minutes for the relevant month, when published.

There were no further agenda items for discussion at the July TEP meeting.

8 AOB ITEMS

There were no items of AOB raised at the July TEP. The chair then brought the meeting to a close.
